At last! You can satisfy that creative urge to do your own artwork even if you can't draw a straight line with paper and pencil.

Now there's Migraph Easy-Draw[®], the object-oriented drawing program that makes it easy for anyone to create professional-looking line drawings, technical illustrations, and reports with a personal computer.

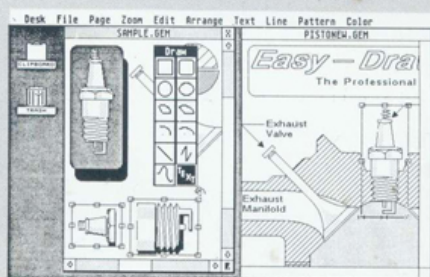

Easy-Draw is fast, flexible and just plain fun to use. With it you can: create complex illustrations, floor plans, landscape designs, etc. By using both the text and graphics features you have a simple desktop publishing system that can be used to create: newsletters, brochures, presentation aids, forms, ads, flyers, and much more.

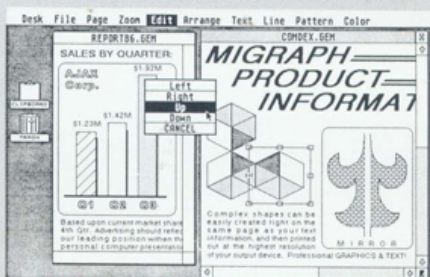

Newsletters, etc., go together quickly since you can place text and graphics on a page in any format. No more messy paste-ups.

Easy-Draw lets you zoom in on a specific area of your drawing, and then continue to zoom in, to get the fine detail you want.

Use one of two windows to draw your objects. When moving objects between windows, Easy-Draw automatically copies them for you.

It's easy to be creative using the flip/mirror feature. The patterns and designs you can create are endless.

The Professional Drawing Program for the Atari ST
